---

Chris – We had discussed Just doing a second PolRep & Final Combined, but we had said we would stay involved until removal of visible oil was complete. Due to delays in Sampling Plan approval (they just received approval last week), they should be finished with removal of the visible areas this week. I need to get a final increase in the FPN (didn't account for all the charges back in the REOC) and I know Jon will be looking for a PolRep when I make the request. PolRep 2 has been sitting there for a few weeks and I am not sure if Jon may have already saved a copy. Let me know your thoughts.
